# STEERING THE COURSE TOWARDS AN **ENVIRONMENTALLY RESPONSIBLE FUTURE**

*“As I look ahead, I feel excited and optimistic about the future of cruising, and the key role that MSC Cruises will play in reducing our impact on our blue planet.”*

**PIERFRANCESCO VAGO**

Executive Chairman

For us sustainability means protecting the environment, supporting the people who work with us and choose to travel with us, as well as the communities and places that we visit and do business with.

As a family-owned company with three centuries of seafaring heritage, MSC Cruises is committed to preserving our oceans and our planet, both now and for future generations. With our cruise sustainability programme we are introducing cleaner fuels across our new ships in the future, promoting responsible travel through our excursions, reducing plastics, recycling waste on all our ships and we can produce our own freshwater on board directly from the sea.

## OUR RESPONSIBILITY: SUSTAINABILITY

From introducing on our latest ships one of the cleanest burning marine fuels today to our state-of-the-art water treatment facilities, we're considering the environment at every step. To preserve the sea we call home, and change cruising for good.

A particular focus is on **decreasing air emissions**, with systems in place to meet or exceed regulatory limits, and efforts to **reduce our carbon emissions** profile, including extensive energy efficiency measures on board every ship. Reducing and recycling waste generated onboard is a key focus across our entire fleet, and we are working hard to eliminate all non-essential single-use plastics from our ships.

Over 85% of freshwater produced on board our fleet is from desalinated seawater – up to 3 million litres per ship every day!

**Advanced wastewater treatment** ensures all water consumed is purified before returning to the sea. Every ship in the fleet has a dedicated full-time Environmental Officer responsible for environmental compliance and providing training and education to all our crew.

# OUR NEW SHIP: MSC WORLD AMERICA

Cruising the Caribbean from April 2025

Get ready to discover a new world on MSC World America. Experience the future of cruising on a ship designed for immersive and enriching experiences at sea. This is a ship where European elegance meets modern, contemporary comfort, immersive features and experience unique emotions. It's a new generation of excitement, for a new world of cruising.

MSC World America has been carefully designed to help reduce her impact on the environment:

## **LNG FUEL**

MSC World America is our third ship powered by Liquefied Natural Gas (LNG) and is ready for a variety of renewable fuels, including Bio-LNG and Synthetic Renewable LNG. LNG significantly reduces Sulphur Oxides (SOx) and Nitrogen Oxides (NOx) as well as reducing greenhouse gas emissions compared to conventional marine fuels.

## **LATEST TECHNOLOGY HVAC**

(Heating, Ventilation, Air Conditioning)

Distribution of heat and cold air to minimize the energy required to keep guests and crew comfortable.

## **HEAT RECOVERY**

Onboard heat recovery systems ensure we don't waste the heat generated by our engines, instead we can redirect it to heat our pools or create freshwater.

## **ANTI-FOULING PAINTS**

The hulls of all MSC Cruises' ships are coated with paints which impede the growth of barnacles, algae and marine organisms to reduce drag.

## **UNDERWATER RADIATED NOISE CONTROL**

Optimised hull design and latest generation of propellers to decrease resistance through the water and reduce underwater noise.

## **ADVANCED WASTEWATER TREATMENT**

The system treats wastewater to a very high quality better than many shoreside municipal standards around the world.

## **TRIM OPTIMISATION**

Monitoring the way the ship sits in the water allows the crew to keep the vessel's trim optimised to reduce fuel consumption and optimize performance.

## **LED LIGHTING**

Energy efficient LED and fluorescent lighting is used throughout the ship.

## **BALLAST WATER TREATMENT SYSTEM**

A system to prevent the transportation of invasive species through ballast water

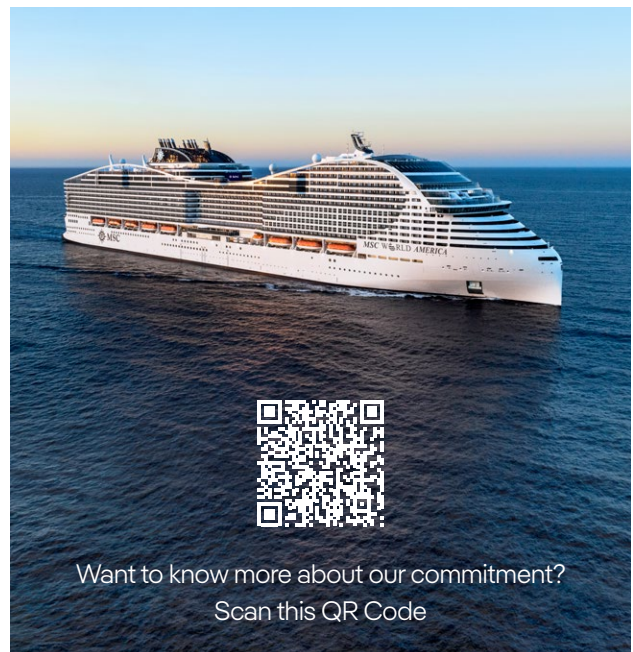

## **SHORE-TO-SHIP POWER**

Ready to connect to local power grids, allowing the engines to be switched off in port.

The public areas on board are organized for the first time into districts. Every district has its own atmosphere, energy, and appeal, giving each of these distinct areas of the ship its own clearly recognizable personality, even as the activities and entertainment taking place there evolve over the course of each day. This feature makes it easy for guests to plan their movements around the ship and shape their onboard experience to their individual preferences from one moment to the next.

The onboard experience comprises a vibrant variety of new locations, exquisite chef's selections and innovative dining destinations. The ship offers the widest choice of accommodation and the highest standards of comfort. With 19 different cabin types to choose from, there's an ideal solution for every kind of guest.

Whatever option you choose, you can be sure of a one-of-a-kind cruise experience on MSC World America.

# MSC FOUNDATION

## TOGETHER WE CAN MAKE A DIFFERENCE

The MSC Foundation leads and advances all the MSC Group's marine conservation, humanitarian and sustainable development commitments worldwide.

At MSC Foundation we work to **restore** the **critical balance** between **people** and **nature**, using MSC's global reach and unique knowledge of the sea to take immediate action to **protect** and **nurture** the "**blue planet**" and **its people**.

Our programmes include supporting researchers and marine experts to restore the coral reefs and to protect the marine ecosystem at **Super Coral Programme**; and supporting **UNICEF** in the Ivory Coast to foster a women-empowering recycling market that makes plastic waste

into low-cost bricks to build much-needed classrooms. In Senegal, we're supporting **Mercy Ships** to provide lifesaving operations in remote areas. In the Mediterranean, we're with **Marevivo**, raising youth awareness of marine protection and sea pollution.

Globally, we support emergency response initiatives in disaster situations, promptly obtaining and transporting first relief goods to affected areas and their most vulnerable populations.

### PROTECTING THE WIDER WORLD FOR THE FUTURE

The MSC Foundation is hard at work researching and restoring the coral reefs around our private Bahamian island, Ocean Cay. So far, incredible strides have been made to create a sustainable, biodiverse environment across the island and within its rich waters that are host to hundreds of coral varieties and fish species.
